

There is nothing wrong with competition, we have a right to receive are programming wherever and from whoever wish. XM Satellite Radio is the greatest thing going. If I want 50's, bluegrass, News and even the traffic back in LA, it's great, it's too bad there are no 50's or 60's stations in the Denver, Northern Colorado region.

Don't take away the competition, what happened to all the commercial classical music stations in this country - they are gone!
